Dear Mrs. Main,

Organ repairs, St. Mary the Virgin, Clopton

I attach my report on the work recently undertaken and comments on possible future actions.

The organ is without question by Hill & Son of London and is therefore of the highest quality and by one of the most reputable nineteenth century firms. It was pleasurable to see pipes bearing their typical markings.

In general the organ is in good condition for its age, and to keep it in satisfactory condition after well over a hundred year it needs regular playing. The actions for the future are mainly cosmetic and non-urgent but the intrinsic value of this organ justifies its care and upkeep.

I should very much like to see you and your colleagues at the church and to explain the work I have done and to show you its musical value.

I attach an invoice for half the quoted sum and will send a further invoice in four weeks time.

Please let me know if any faults arise for my attention.

Yours sincerely,

Roger Pulham
